

## ASA Rocks the LITE!

We are excited to announce our Christmas performances at the LITE center! This will be the first ever performance of its kind for the facility. We will be using their custom built 37 \* 11 foot curved 3D screen to produce live video as a backdrop to the student band performances and still imagery for our piano and vocal recital. We will be streaming the show live on right here on our website, so tune in if you can not make the performance. Saturday, December 19, 2009 - 1P - 3P

Located in the Research Park of the University of Louisiana at Lafayette, the \$27 million, 70,000 square foot LITE complex is one of the most comprehensive and tightly integrated data visualization and supercomputing installations in the world. The unique collaboration between the University of Louisiana at Lafayette and the Lafayette Economic Development Authority (LEDA) makes LITE a one-of-a-kind facility that connects the most creative and dynamic academic minds with the most innovative and forward-looking industry visionaries. The LITE center hosts commercial businesses and researchers who require large scale collaborative environments for research, application development, testing and validation, product development, commercial production and high performance computer modeling powered by the fastest most comprehensive supercomputing and 3D immersive visualization systems and massive data storage capabilities available today. LITE is a hub for advanced research activities and high-performance computing connected to the Louisiana Optical Network Initiative (LONI) infrastructure.
