Rock Camp is the biggest event that we do every year, and by far what we are most known for. Every year, parents and students ask us if we would ever consider making Rock Camp longer or doing it more often. We are finally able to offer, what we believe, is the best of both worlds - group drums and guitar sessions with the Rock Camp performance experience.

The perfect mix of group drum / guitar class and Rock Camp. We teach students how to play their instruments, read music and / or tab in a group class. For the end of session recital, we teach them songs, then combine the guitar and drum classes. We also add keys, bass and / or vocals and put the super groups together just like we do for Rock Camp!

This gives students a great opportunity to not only learn their instruments, but also the opportunity to play with other musicians and perform in front of an audience.

What students do in our group classes:

- learn theory and technique
- learn how to play their instrument
- engage with other students in a relaxed, social environment
- push each other to practice and improve
- learn how to learn songs and play with other musicians
- performance opportunities in front of an audience
- natural gateway to ASA bands

Benefits of our Rock Camp format:

- because there are multiple students playing each instrument / part, there is no pressure on any individual to play his / her parts perfectly and carry the group.
- if mistakes are made, they are covered up by other performers
- provides young students the opportunity to play and perform songs that they would normally not be able to
